

The digital series [Aurorae Borealis Studia Classica](#), which consists of old digitized texts on the aurora borealis accompanied by introductions and other additional material written by modern scholars, has existed since 2016. Its editor is senior academic librarian and historian of science Per Pippin Aspaas. This dataset of user statistics was compiled from the Open Journal System platform on which the series is published, on 3 October 2023. Volumes are not listed chronologically, but according to their usage. - *The editor*
