

Table 5. Estimated density and abundance of sei whales identified with high, medium and low confidence from the combined platforms using revised (non-compromised) effort sailed under acceptable conditions.  $n$ - number of sightings;  $L$  – effort (nm);  $E(S)$ - group size;  $esw$  – effective search half width (m);  $f(0)$  – probability density of the detection function at distance 0;  $D$ - density of animals (number  $nm^{-2}$ );  $N$ - abundance,  $N_s$  uncorrected for perception bias,  $N_c$  corrected for perception bias; LCL and UCL – upper and lower confidence limits;  $p(0)$  – probability of detection at distance 0.
