TOMORROW TODAY

Designing innovative peer review and dissemination pilot studies

GEORG-AUGUST-UNIVERSITÄT

Michela Vignoli, Oliver Zendel, Matthias Schörghuber AIT Austrian Institute of Technology — {NAME.SURNAME}@ait.ac.at

WP3,

WP4

WP3,

WP4

WP7

#### THE OPENUP PROJECT

review-disseminate-assess cycle involves different stakeholders: researchers, publishers, research institutions, funders, private companies, industry, and citizens.

OpenUP will implement a series of hands-on pilots to validate OpenUP's proposed open peer review, innovative impact dissemination indicator and frameworks. The pilots will be carried out in close cooperation with selected research communities from arts and humanities, social sciences, life sciences, and energy.

#### **OVERVIEW**

#### Peer Review Framework

State of the art & gaps

Stakeholder needs & requirements analysis

Peer Review & Dissemination in novel contexts

> WP3, WP4

#### Pilots

- 1) Open Peer Review for Conferences
- Addressing and Reaching Businesses and the Public with Research Output

WP6

Pilot 2

Applicability in specific settings & research communities

Needs & requirements validation

Identify good practices / gaps

> **Innovative** Dissemination Framework

### **EXPECTED IMPACT**

OpenUP will evaluate the practicability of the identified frameworks in particular settings. It also intends to disseminate and create success stories, best/good practices, and policy recommendations, which will help further communities implement working Open Science approaches in their

research evaluation and

communication strategies.

#### 1) OPEN PEER REVIEW FOR CONFERENCES

#### **Traditional Peer Review**

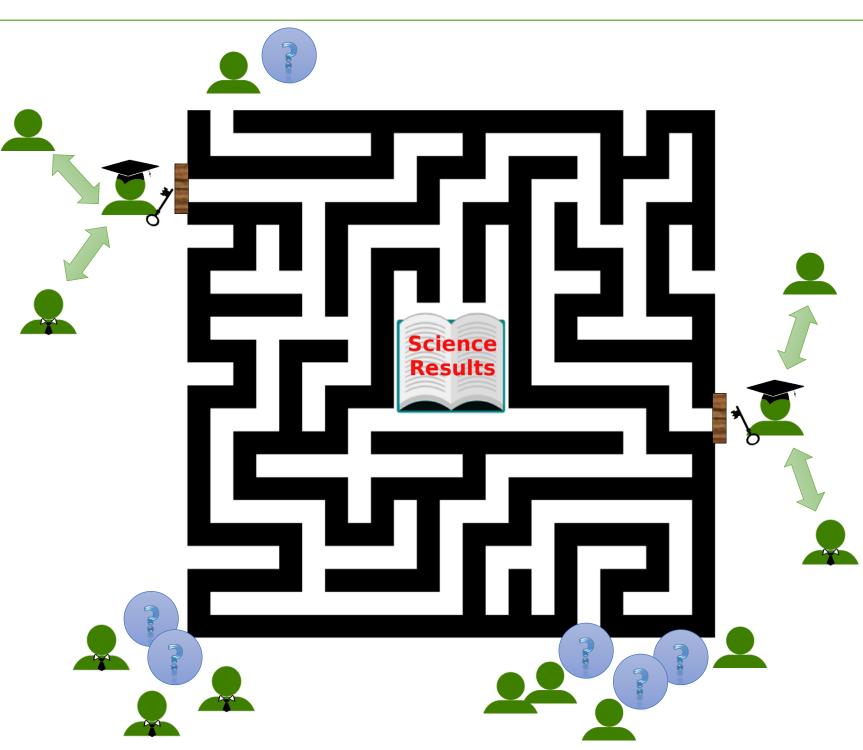

Authors Reviewers **TRADITIONAL** Register Submit 1<sup>st</sup> Review Rebuttal 2<sup>nd</sup> Review

## **Open Peer Review**

Pilot 1

# 2) REACHING BUSINESSES AND THE PUBLIC WITH RESEARCH OUTPUT

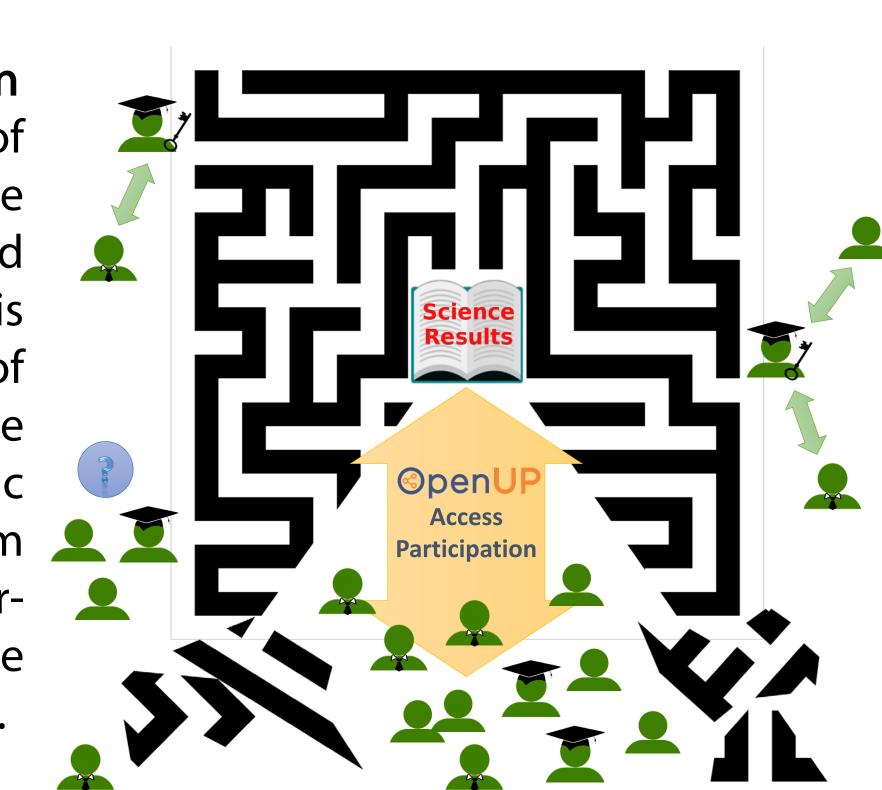

#### **Current Science** Dissemination

Researchers are the gatekeepers of scientific infor-Dissemination mation. science results to businesses the public happens through traditional channels. The vast majority of business and public stakeholders do not have direct access to science information.

#### **Open Science Dissemination**

Researchers are enablers of communication of science results. Additional access and participation to science is enabled by communication of science via appropriate channels. Business and public stakeholders can profit from 🔔 💆 accessible, useful, understandable, and re-usable science information and data.

#### **OBJECTIVES PILOT 1**

#### Improve Quality Assessment

- Reduce impact of low quality or biased reviews
- Allow higher number of reviewers and experts

#### **Increase Transparency**

- Reviewer comments are openly accessible
- Publicly documented decision process

#### Add Incentives for Reviewers

- Effort and work by individual reviewers is visible
- Reviews are citable

#### **Enable Early Access**

- Discussions and networking prior to conference
- Papers accessible earlier
- All reviews accessible

#### **OBJECTIVES PILOT 2**

Map existing and alternative forms, formats, and channels of open science communication

#### Explore how targeted audiences (businesses, general public) can be best reached via these channels

- Elicit stakeholders' requirements and expectations towards useful and appealing communication of science results
- Actively involve energy research community projects beyond OpenUP
- Apply communication standards and channels to energy area
- Evaluate the impact and resonance at the targeted audiences
