Transparency and collaboration at the heart of new developments at Crossref
Crossref makes research outputs easy to find, cite, link, assess, and reuse.

We’re a not-for-profit membership organization that exists to make scholarly communications better.
What’s new?
Preprints, peer reviews and data citation

• 80,707 preprints registered with Crossref. Where possible, these link to the published version (and vice versa in some cases)

• 13,659 peer reviews, letting them be cited persistently and linked to the relevant content

• Working with DataCite to promote data citation to provide transparency and aid reuse of content
How to love (your) metadata
Participation Reports

- Launched in June 2018
- An open and free report - anyone can check
- Allows you to see all of the metadata coverage of any Crossref member
- Includes 10 metadata checks
- In beta
- New releases will have additional features
How good is your metadata?

Helping members deposit richer metadata

- Metadata Manager launched in beta in July 2018
- Aims to:
  - Simplify and streamline the Content Registration service, with a user-friendly interface
  - Give members greater flexibility and control of metadata deposits
  - Supports users who are less familiar with XML
  - Helps boost metadata quality, and encourage cleaner and more complete metadata records
