IFLA STATEMENT ON COPYRIGHT EDUCATION AND COPYRIGHT LITERACY

This IFLA policy statement, aimed at governments (including intergovernmental organisations), libraries, library associations and library educators, looks to explain the concept of copyright literacy, its importance within the broader work of libraries, and make recommendations for improvements.

Copyright laws with appropriate limitations and exceptions are critical to the work of libraries, enabling activities such as access, lending, copying and preservation. Having few or no adequate provisions for libraries creates serious restrictions on the ability of our institutions to carry out their mission of giving access to information legally.

Nonetheless, the experience of users is shaped as much by the way in which libraries interpret and apply the rules, as by the text of the law itself.

IFLA's *Code of Ethics for Librarians and Other Information Workers*¹ underlines that alongside the responsibility to recognise intellectual property rights, there is a parallel duty not to impose unnecessary restrictions on users' right to access information. In short, libraries should use all possibilities provided by the law to give access and enable learning.

To do this, librarians and other information workers need to be copyright literate, in order both to carry out their own functions and duties, and to support colleagues and users, in the most effective way possible.

Copyright literacy can be defined as sufficient copyright knowledge to be able to take well informed decisions on how to use copyrighted materials². It includes understanding the structure, functioning and implications of the copyright system, as laws, practices, and user expectations evolve. Copyright education is the process of developing and updating copyright literacy.

Copyright literacy is an issue for all types of library. Public and school libraries, for example, may need to advise library users, staff and others on what they can copy or use, make accessible format copies of works for people with disabilities, or provide educational services (including activities such as maker spaces).

¹ IFLA Code of Ethics for Librarians and Other Information Workers (2012): <https://www.ifla.org/publications/node/11092>. The Code of Ethics also underlines a duty to advocate for stronger user rights in future. It is worth noting that experts have also noted a the 'latent flexibility' within copyright law – [Stalson](#) (2019, forthcoming).

² "Acquiring and demonstrating the appropriate knowledge, skills and behaviours to enable the ethical creation and use of copyright material", Secker and Morrison, (2018) p.211. Morrison and Secker define it as the "increasing range of knowledge, skills and behaviours that individuals require when working with copyright content in the digital age" (Morrison and Secker, 2015). Arguably, a copyright-literate person also understands the wider policy debate around copyright, and whilst not necessarily engaging directly in copyright advocacy is able to relate their own approach to the history and development of copyright laws. This involves an awareness of the inherent tensions between the various stakeholders.

IFLA (2018) Accelerating Access: IFLA Statement on Copyright Education and Copyright Literacy. Available at:
<https://www.ifla.org/publications/node/67342>

Definition of Copyright Literacy

“acquiring and demonstrating the appropriate knowledge, skills and behaviours to enable the ethical creation and use of copyright material.”

Secker and Morrison, 2016, p.211

Copyright Literacy Strategy Vision

Copyright Literacy Strategy

Our vision

By 2025 people working and studying at the University of Kent will feel confident in making informed decisions about using copyright material and will understand the role copyright plays in innovation and creation of new knowledge.

The University's approach to copyright education will support its strategic objectives by informing policy and practice.

The University's approach to copyright education will support its strategic objectives by informing policy and practice.

Copyright Literacy Strategy Values

Our values

The University takes a responsible yet critical approach to copyright law. This recognises that:

- Staff and students are expected to behave lawfully and responsibly, but should be able to question assumptions about copyright law.
- A balance is required between the concept of copyright as private property and the importance of communication and dissemination of knowledge.
- Management and licensing of copyright content created by University staff and students requires different approaches depending on the context.
- The use of fair dealing and statutory copyright exceptions is an essential aspect of academic activity and a vital supplement to the use of licensed resources. The University will support its staff and students in taking advantage of these legal provisions.
- It is often necessary to take a risk-managed approach to copyright when working with third party copyright material.
- Copyright law operates on an international basis and good decision making requires an appreciation of different cultural and legal customs.
- There are a number of related legal and compliance issues such as information security, data protection and accessibility considerations which often need to be considered alongside copyright when assessing risk.

Copyright Literacy Strategy Activities

Our activities

The University will take the following actions:

- Create a Copyright Literacy Steering Group to oversee progress with the strategy.
- Review its policies relating to copyright law to ensure they reflect the institution's strategic objectives. This process will highlight potential conflicts and suggest ways of addressing these where appropriate.
- Develop its copyright guidance to support staff and students using user experience design principles. This will ensure guidance is concise, in plain English and easy to access.
- Contribute to sector-wide developments in defining and communicating codes of best practice in fair dealing.
- Monitor developments in copyright law and consider whether these require a change to University strategies or policies.
- Develop a network of staff whose roles involve advising on aspects of copyright law to identify opportunities for education, training and communication. This recognises that copyright often has to be addressed in context and alongside other issues. The network will include staff responsible for:
 - Academic Development
 - Digital Accessibility
 - Digitisation of library collections and archives
 - Embedding aspects of copyright law in taught programmes, including but not limited to creative subjects
 - Exploitation of research and innovation
 - Information Governance
 - IT Security
 - Learning Development and Support for Students
 - Licensing and provision of library resources
 - Marketing and Communications
 - Open educational and publishing practices
 - Online teaching
 - Professional development for staff
 - Risk Management
 - Scholarly Communications

Copyright policy and guidelines

Overview | Using copyright works | Digital copyright | Types of material | Creating copyright works | Illegal downloads | Links

Copyright is now an unavoidable and important aspect of university life and these pages are designed to help you navigate your way through copyright law. The guidelines and links aim to provide the fundamentals that you need to know about copyright and related rights at the University of Kent so that you can:

- identify whether and how copyright issues affect your work
- make informed decisions on the best way to address copyright implications with reference to the University of Kent's copyright policy (pdf)
- find out who to contact for further advice.

You can also [download these guidelines as a pdf.](#)

Copyright is an area of the law which is often misunderstood, and although straightforward in principle, in practice it can become complex which can lead to individuals and organisations finding themselves on the wrong side of the law. In order to minimise the risk of infringement which can lead to civil or criminal charges University staff, students and partners are advised to refer to these guidelines and if in doubt email copyright@kent.ac.uk for further advice or clarification.

What is copyright?

Copyright is a type of intellectual property right which covers all original, creative outputs of the human mind once fixed in a tangible form (eg written down or recorded). It therefore covers books, journals, paintings, photographs, software, music, film, sound recordings, broadcasts and many other things whether published or not. Copyright also arises automatically as soon as these works are fixed (even if they only ever exist in a digital format) so it can extend to works that many do not realise are copyright protected such as private letters, sketch drawings, emails and contributions to social media services.

Support and advice

Copyright Guidance – Performing works in class

Showing recorded media

You can show films or play recorded audio to students without needing a licence from the copyright owner in:

- lecture or seminar rooms.
- online teaching events as long as you only provide access only to your students

This is because there's a specific copyright exception which covers the performing, playing or showing work in the course of the activities of an educational establishment.

Copyright and Online Learning SIG

Background

The CoOL (Copyright and Online Learning) SIG was established in November 2020. The group will focus on copyright issues associated with online learning, digital education, and learning technology. It will also consider broader copyright issues associated with access to information.

Remit

- The group operates as a community of practice and helps to support local communities of practice in the field of copyright, online learning and learning technology.
- It will look to develop and recognise copyright expertise within the educational community
- Advocate for copyright literacy within the community and more broadly.

In common with ALT Members Groups and SIGs this group will :

- Support activities in line with ALT's strategic aims
- Share ALT's values of being participative, open, collaborative, innovative, inclusive and transparent

Officers

The SIG officers are:

- Co-Chairs: Jane Secker (City, University of London) and Chris Morrison (University of Kent)
- Co-Secretary: Jenny Greene (University of Bangor), Caroline Lloyd (University of Nottingham)
- Events coordinator: Elizabeth Charles (Birkbeck, University of London), Shazia Arif (Brunel,

Measuring Success

Measuring Success

This strategy will enable the empowerment of staff and students but recognises that it will be challenging to compile quantitative data on behavioural change. It will therefore report on a range of available measures including:

- Case studies demonstrating how the strategy is supporting teaching, research and engagement at Kent
- A periodic survey measuring confidence in working with copyright amongst staff
- Numbers of enquiries to the copyright support team
- Analysis of engagement with online guidance
- Number of people who have attended copyright training sessions
- Level of engagement with other institutions on Kent's approach

Measuring Success

Measuring Success

This strategy will enable the empowerment of staff and students but recognises that it will be challenging to compile quantitative data on behavioural change. It will therefore report on a range of available
