Open Access Monitor Germany

open-access-monitor.de

The open access monitor records the publication output of German academic institutions in scientific journals. Through analyses of subscription fees and publication fees, the transition towards an open access system is supported. Organizations in OAM’s database are mapped to ROR IDs that are displayed in the frontend. OAM uses ROR IDs to describe and manage organizations.

- 6,315 organizations managed with ROR IDs
- See “Open Access Monitor Germany and ROR,” February 2022

ROR Metrics & Resources Nov 2022

102,993 organizations in ROR
