

BOKANMELDELSE

Bookreview

E. E. Syroechovskij, 1986:
Severnij Olen (Reindeer)

Moskva Agrolromisdat. 256 p.

Contents: (translated from Russian)

<i>Forword</i>	3
<i>Author's note</i>	5
Chapter 1. Characteristic features of the species. Adaptations to the North conditions	7
PART I. GEOGRAPHIC DISTRIBUTION AND NUMBER OF WILD REINDEER WITHIN THE WORLD RANGE	
Chapter 2. Geographic distribution and numbers in the USSR (European part of the USSR; West Siberia; Yakutia; North of the Far East; South of the Far East; Mountains of South Siberia)	10
Chapter 3. Geographic distribution and numbers in foreign countries (E. V. Rogacheva) (Western Europe: Iceland; Norway, Svalbard; Sweden; Finland; Great Britain. North America: Canada; USA; Greenland. Central Asia: China; Mongolia. Subantarctic: South Georgia).....	81
PART II. BIOLOGY AND ECOLOGY OF REINDEER	
Chapter 4. Foods and range studies	94
Chapter 5. Breeding biology. Development and growth. Moulting	106
Chapter 6. Factors limiting population (natural mortality; predation; competition)	119
Chapter 7. Diseases and parasites	135
Chapter 8. Geographic peculiarities of population structure. Population dynamics	150
PART III. WILD REINDEER HUNTING AND PROBLEM OF THE CIRCUMPOLAR CULTURE OF REINDEER HUNTERS	
Chapter 9. History of wild reindeer hunting in Neolith and circumpolar culture of reindeer hunters	157
Chapter 10. Ecological and ethnographic peculiarities of reindeer hunting in North Eurasia: Central Siberia; Taimyr (Nganassans; other Taimyr peoples of pre – Dolgan period and an attempt of an ecological – ethnographic reconstruction of reindeer hunters culture); Northeast Asia (Yukaghirs and the Yukaghir stage in the reindeer hunters culture; other peoples of Northeast Asia as reindeer hunters: chukchi, koryaks, evenks, evens, northern yakuts); North of West Siberia; North of Russian Plain (nenets); The Kola Peninsula (saami)	170
PART IV. RATIONAL USE AND PROTECTION OF WILD REINDEER	
Chapter 11. Scientific bases of wild reindeer resources use. Hunting reindeer management: ecological, economic and sociological prerequisites. The first stage of rational use of wild reindeer resources ecological principles of strategy and tactics of rational use of wild reindeer resources; present state of the problem of wild and domesticated reindeer relations and constructive ways of its solution; hunting reindeer management and domesticated reindeer herding: ecological and economic problems; constructive ways to solve the problem of wild and domesticated reindeer co – existence	211
Chapter 12. Wild reindeer protection: ecological principles of the wild reindeer protection methodology; population – geographic peculiarities of theory and present state of wild reindeer protection; rare forms of wild reindeer in Red Books	231

E. E. Syroechkovski (58) is professor, Dr. of Biology, corresponding member of the USSR Academy of Agricultural Sciences. Chief of the Laboratory of protection and rational use of the fauna (Institute of Evolutionary Morphology and Animal Ecology, Acad. Sci. USSR, Moscow). Head of the Northern Ecological Station of the USSR Acad. Sci. (Siberia, river Yenisey, Thurukhansk district). Chairman of the North Problems Council, USSR Acad. Agric. Sci.

340 scientific articles and 16 books. 35 expeditions to different regions of North Siberia, Mongolia, Antarctica and two journeys to Canada and Alaska.

Scientific specialities: animal ecology; zoogeography; nature protection in the North; game management in the North; reindeer husbandry; ethnography of the Eurasian North. Main scientific subjects: reindeer, caribou; birds and big mammals of Northern Asia.

Adress: USSR Acad. Sci., Inst. of Evolutionary Morphology and Animal Ecology, Leninski prospect 33, Moscow V-71, USSR 117071.

**Proceedings of the Fourth International Reindeer/Caribou Symposium
Whitehorse, Canada 22–25 August 1985.**

This book (374 pages) is available from **Rangifer**, Box 378, N-9401 Harstad, Norway.
